

Hawlemont School

All-ages Flu and Covid Vaccine Clinic

November 17, 2025 4-6 pm

Current CDC vaccine recommendations indicate everyone aged 6 months and older should get an annual flu vaccine. CDC has adopted individual decision-making for 2025-26 COVID-19 vaccines.

Massachusetts Dept of Public Health recommendations for 2025-26 COVID-19 vaccine align with the Northeast Public Health Collaborative and indicate at least one dose of COVID-19 vaccine for all children age 6-23 months, all children age 2-18 with medical conditions associated with higher risk for severe COVID (or having household contacts with higher risk), and all children who have never been vaccinated. In Massachusetts, healthy children age 2-18 may receive a single dose of age-appropriate 2025-26 COVID-19 vaccine.

Register in advance to reserve your dose(s)

To register, pick up form at the school or Charlemont Federated Church.

Completed forms must be turned into Hawlemont School Nurse Office or in person to Sheila Litchfield by November 7 to reserve your dose

Please bring all insurance cards to the clinic, where they will be copied.

Vaccine eligibility information & additional clinic dates in Franklin County can be found at <https://frcog.org/covid>
